

CARBON FOOTPRINT

KGCO₂e sample report
per recipe

Madras-Style Potato Burger

Carbon Dioxide Equivalent for the entire
recipe

Low Carbon Footprint

0.705

Kg CO₂e

**0.138 Equivalent kms
driven**

Avocado Toast

Carbon Dioxide Equivalent for the entire recipe

Low Carbon Footprint

0.655

Kg CO₂e

0.129 Equivalent kms driven

What does kg CO₂e include?

The footprints include emissions of carbon dioxide (CO₂), nitrous oxide (N₂O) and methane (CH₄). These are aggregated into a single number expressed as kilograms of carbon dioxide equivalents (kg CO₂e).

Our data calculations for different ingredients.

01

Calculations are approximations based on in-store purchases.

02

If for a certain ingredient in-store calculations are not available, we consider at-farm values.
